

M00321-12 FERRULE REPLACES M00320-12 FERRULE

In accordance with Manuli Hydraulics' policy of continuous improvement, the M00320-12 ferrule will be replaced by the newly created M00321-12 ferrule, effective immediately.

The new M00321-12 reference is a direct replacement for the M00320-12, and can be used in all situations where the M00320-12 was used.

Similarly, the crimping data for the M00321-12 reference is identical to that of the M00320-12.

The only physical difference between the two references is an improved design around the latching area, providing a more resilient connection.

If you have any questions regarding this change, please contact your local Manuli Sales Representative.
