

WATER CLEANING & BLASTING

WATER CLEANING & BLASTING

INTRODUCTION

The water cleaning hose range offered by Manuli can be applied to both hobby and professional water cleaning machines with both hot and cold water (not suitable for vapour steam applications).

They are designed according to safety norm IEC-2 with a safety factor (burst / working pressure) of 4:1.

The water blasting hose range is designed for maximum robustness and ease of handling.

Given the importance of safety and performance when connected with any blasting application, this range has a complete, dedicated fittings range, whilst the safety factor (burst / working pressure) of 2,5:1 is compliant with international specifications (AS/NZ 4233.2, RMA-USA, ISO7751, BFPA-UK, EN 1829-2).

CLEANING & W0-2

WATER CLEANING & BLASTING INDEX

| RANGE | HOSE | HOSE STRUCTURE | KEY PERFORMANCE | SECTION | ITEM |
|-------------------|------------------|----------------|----------------------------|---------|------|
| | K-JET | Wire braided | Pressure wash | | 1 |

K-JET (BLACK)

PRESSURE WASH - BLACK VERSION

KEY FEATURES

- Dust free smooth surface
- Indelible branding
- Compact structure: easy handling, reduced bend radius
- Good abrasion resistance
- Designed to meet IEC-2 (safety factor 4:1)

APPLICATIONS & FLUIDS

- · Water-cleaning equipment, ideal for hobby and semiprofessional machines
- Water, mineral oils, vegetable and rape seed oils, glycol and polyglycol based oils, synthetic ester based oils, oils in aqueous emulsion

SAFE WATERBLAST TECHNOLOGY

KEY FEATURES

- Basic hose line for scale removing applications
- Compactness, lightness and flexibility
- Safety factor 2,5:1 (accepted world standard as specified by RMA-USA, BFPA-UK, DIN-Germany, ISO 7751
- High abrasion resistant cove

APPLICATIONS & FLUIDS

- Waterblasting, scale removing applications using extreme high working pressures:
- building and industrial sectors (roadworks, removal of concrete from reinforced concrete structures safeguarding metal components);
 - scale removal ships hulls in shipyard;
 - dust elimination
- · Water, water soap, emulsions

15 °F / 158 °F -10 °C / 70 °C

MAX OPERATING TEMPERATURE

93 °C, 200 °F

TUBE

Water resistant synthetic rubber

REINFORCEMENT

Four high tensile steel spirals

COVER

Synthetic rubber with high temperature, ozone and abrasion resistance

APPLICABLE SPECS

MANULI® Design, Australian Std. AS/NZS 4233.2

TYPE APPROVALS

CU-TR; MSHA

BLASTING &

GOLDENBLAST/PLUS

SAFE WATERBLAST TECHNOLOGY

KEY FEATURES

- Hose line for waterblasting with pressures up to 1250 bar
- Compactness, lightness and flexibility
- Safety factor 2.5:1 (accepted world standard as specified by RMA-USA, BFPA-UK, DIN-Germany, ISO 7751)
- High abrasion resistance cover

APPLICATIONS & FLUIDS

- Waterblasting, scale removing applications using extreme high working pressures:
- building and industrial sectors (roadworks, removal of concrete from reinforced concrete structures safeguarding metal components);
- scale removal ships hulls in shipyard;
- dust elimination
- · Water, water soap, emulsions

BLASTLOCK TYPE

ASSEMBLING INSTRUCTIONS

The following assembling instructions are strongly recommended for heavy-duty applications

The crimping operation to apply BLASTLOCK fittings must be carried out with proper high performance crimping/assembling machines, with a crimping force higher than 2,800-3,000 kN, and approved by Manuli Hydraulics. This is in order to guarantee the optimum coupling assembly deformations and correct hose gripping.

It is recommended that the detailed assembling instructions are followed. These are supplied by Manuli Hydraulics to customers, assemblers and operators using the integrated package, GOLDENBLAST hose & BLASTLOCK fittings.

Each assembly must be pressure tested at the pressure level required by the reference specifications (e.g. EN 1829-2 requirement is 1.5 times the WP for minimum 30 seconds) and taking into consideration all safety implications.

Specialised personnel are recommended for the assembling operation of BLASTLOCK fittings.

| PART REF. | THREAD SIZE | OR SUPPLIED (NBR 90 ShA) | TIGHTENING TORQUE (Nm) |
|--------------|-------------|-----------------------------|------------------------|
| M66613-6-22 | M 22 x 1.5 | 10 x 2 | 70 |
| M66613-08-24 | M 24 x 1.5 | 12 x 2 | 100 |

| M66613-16-42 | M 42 x 2 | 25.3 x 2.4 | 220 |

BLASTLOCK TYPE

RECOMMENDATIONS

Please see the following recommendations for the safe and correct use of the Manuli Goldenblast product line:

- **Don't mix and match:** MRI highly recommends the use of it's integrated waterblasting package. The use of alternative hose or fittings can result in poor quality and reliability of the assembly.
- In line with international regulations, all waterblasting assemblies should be **tested to 150% of the** indicated maximum static working pressure before using.
- If waterblasting assemblies are used at a pressure exceeding the maximum working pressure indicated, the assemblies structure can cause an over-stressed situation. For the same reason **pulsating pressure** situations also need to be avoided.
- **Relief valves** should be used to preserve waterblasting equipment and hose assemblies.
- When **safety devices** are applied to prevent fitting blow-off, hose elongation and contraction needs to be taken in consideration. Under pressure, the hose length can vary between -4% to +2%.
- Waterblasting assemblies should never be used in "hang down" positions. These conditions can
 cause hose reinforcement restriction to contraction/elongation and over-stress fittings when supporting
 the weight of the hanging hose.
- Strictly avoid applying any external force on the hose assembly, such as axial tension, twisting, kinking
 or crushing.
- **Temperature** influences the resistance to leakage. Working temperature should be maintained below 70°C.
- Hose assemblies need to be replaced in case of damage, such as:
 - hose cover abrasion, cuts, chemical attack, corrosion
 - ✓ reinforcement crushing or twisting
- High pressure water must always be considered as extremely dangerous. Anyone handling
 waterblasting equipment should wear proper protective clothing, boots and eye protection.
